

About Super Motherload

Set on Mars in an alternate Cold-War era, Super Motherload is a 1 to 4-player couch co-op digging adventure with storyline by Image Comics' Kurtis Wiebe, a fully voiced cast of Soviet and American characters, and a procedurally-generated world that changes each time you play. Purchase powerful upgrades and supplies for your mining pod as you progress and prosper, as well as rare special abilities with random availability.

You, the player, work for Solarus Corporation, an interplanetary mining operation that has developed the infrastructure needed to harvest the precious resources of Mars to meet demand back on Earth. Soon after being dropped on Mars, you begin to discover that things aren't quite as they seem.

Rock Paper Shotgun - "The rewards are dopamine-inducing."

Game Informer - "The tight feedback loop makes it hard to put down."

Key Features:

- Storyline by award winning Image Comic's writer Kurtis Wiebe of BBC's Peter Panzerfaust
- Full Voice Overs and a full-length original score by indie electronic artist Eric Cheng
- RPG-inspired mechanics, including upgrades, quests & special abilities
- Branching storyline choices with Multiple Game Endings
- Over 150 Explosive-based Puzzles to solve
- An Epic Boss Battle
- Storyline & Unlimited Digging gameplay modes
- Support for 4 simultaneous Gamepads -- ideal for Big Picture
- Runs at 60FPS in Full HD (1080p)

Super Motherload is the sequel to XGen Studios' original hit Motherload, and is currently in development for Windows, MacOS & PSN.
